## Oracle Business Accelerator for JD Edwards EnterpriseOne

Oracle Business Accelerators for JD Edwards EnterpriseOne are tools that aid in the rapid, predictable and enduring implementation of JD Edwards EnterpriseOne. Designed for midsize companies, Oracle Business Accelerators remove the complexity of assembling an entire IT solution, while reducing risk and accelerating time-to-value. You get a solid foundation that handles today's business needs, and yet is flexible enough to adapt and grow along with your business.

There are three major modules that are contained within the scope of this Oracle Business Accelerator solution: Financials, Distribution, and Manufacturing.

## Sample Key Business Flows Enabled

### Requisition to Receipt

- Fulfills purchasing requirements in requisition to receipt environment
- Showcases purchasing functionalities such as requisition, quotes, purchase orders, subcontracts, approvals based on defined approval levels and receipts

### Order to Shipment

- Fulfills customer orders in an order to shipment environment
- Executes varied customer shipment models (standard or drop shipments, customer returns)
- Efficiently manages order cycle information – pricing, booking, shipping and various order holds

### Period Close to Financial Reports

- Automates period closing and reporting
- Quickly and effectively generates key financial reports to meet requirements across the enterprise
- Integrated reports for sub-ledger reconciliation
