

## Fusion SCM Senior Consultant / Solution Architect

*Supply Chain Planning & Product Hub (PLM)*

### **About Us:**

Redfaire is a growing, international technology company headquartered in Limerick, Ireland. Redfaire helps global organisations modernise their JD Edwards environments, migrate to Oracle Cloud Infrastructure (OCI), and unlock value through automation, analytics, and innovation.

### **About The Role:**

The role of Fusion SCM Solution Architect is part consultant, part business analyst, part technical architect, and part presales specialist. It requires in-depth knowledge of Oracle Fusion Supply Chain Planning modules (Demand Planning, Supply Planning, S&OP, Planning Central) and Product Hub/PLM capabilities, understanding their strengths, limitations, integration patterns with other Fusion modules, and migration paths from legacy systems.

Sometimes this means recommending process changes rather than customisations, providing best practice guidance on supply chain planning strategies, item master governance, and product lifecycle management that organisations should adopt.

This is a full-time permanent role which may be home based in the UK/Ireland/Europe or in a hybrid structure from our Shared Service Centre in Limerick.

### **Responsibilities:**

Key accountabilities of this role will include (but are not limited to):

- Full ownership of the complete Oracle Fusion SCM solution (Supply Chain Planning and/or Product Hub modules), encompassing both functional configuration and technical integrations. Must see implementations through to completion.
- Set the overall solution vision for implementation teams and guide them through solution execution, ensuring alignment with Oracle best practices and customer requirements.
- Design customer centric solutions using an all-inclusive approach – functional configuration, technical extensions, integrations with Oracle and third-party systems, data migration strategies, and reporting/analytics requirements.
- Mentor and support early career and junior consultants.
- Build and sustain deep expertise in Oracle Fusion Supply Chain Planning (Demand Planning, Supply Planning, Sales & Operations Planning, Planning Central) and Product Hub/PLM (Item Master, Product Data Governance, Product Development).

***Note: An understanding of key integration points with Procurement, Inventory, Order Management, Manufacturing, and Financials is required; deep expertise in all Oracle Fusion modules is not necessary.***

- Demonstrate strong commercial awareness, proposing solutions that respect client budgets, Oracle licensing constraints, and implementation scope.
- Communicate effectively across all levels – from C-suite executives to end users, from technical architects to business analysts, and with Oracle and third-party vendors.
- Deliver compelling presales demonstrations and support business development activities by

showcasing Oracle Fusion Supply Chain Planning and Product Hub capabilities to prospective clients.

#### **Qualifications & Previous Experience:**

- Minimum 5+ years of experience implementing Oracle Fusion Cloud SCM applications
- Strong hands-on experience with **Oracle Fusion Supply Chain Planning** (Demand Planning, Supply Planning, Sales & Operations Planning, Planning Central)
- Strong hands-on experience with **Oracle Product Hub/PLM** (Item Master, Product Information Management, Product Development)
- Experience with Oracle Fusion integrations (FBDI, REST APIs, Oracle Integration Cloud)
- Proven ability to conduct presales activities, including solution demonstrations and proposal development
- Oracle Fusion Cloud SCM certifications preferred
- Excellent communication skills in English; additional European languages are a plus.
- Willingness to travel to European client sites as required.

#### **Nice to Have:**

- Experience with Oracle Fusion Manufacturing, Inventory, or Procurement modules
- Previous experience with JD Edwards or other legacy ERP systems
- Knowledge of Oracle Cloud Infrastructure (OCI) and related services
- Understanding of supply chain planning methodologies (MRP, DRP, S&OP)

#### **What We Offer:**

- Career growth within an expanding global award-winning Oracle Partner recognised for excellence.
- Supportive team culture with ongoing training and mentorship.
- Competitive salary and benefits package.
- Opportunity to engage in flexible working arrangements, including remote options, to help you maintain a healthy work-life balance.

Redfaire is an equal opportunities employer. We are committed to building an integrative culture where everyone feels welcomed and supported. Our inclusive workplace provides an environment that will support your development no matter your gender, civil status, family status, sexual orientation, religion, age, disability, education level, or race.
